YOUNG HOTEL OPENS SUMMER MUSICAL SEASON

Russian Quintet and Two Clever Soloists as Entertainers

MISS THELMA THELMA, the concert singer who comes to the Young Hotel as an entertainer.

A notable season of summer music will be inaugurated at the Young hotel tonight, for the rathskeller and the roof garden. With the Russian quintet, which has recently arrived here, and Miss Thelma Thelma and Miss Marie Edgar, soloists, Manager Thiele has assembled the elements for unusually good entertainment. The dinner-hour in the rathskeller and the after-dinner time on the roof garden are expected to see many dinner parties as well as late comers enjoying the program.

The program to be given by the quintet tonight includes the following numbers:

March—"A Blaze of Glory".....
Overture—"Ungarische Lust-spell".....Keller Bela
"Gittana Waltz".....E. Rusalossi
Violin Solo—"Polonaise".....
Russian Selection.....Lladoff
Cello Solo—"An Dich".....
"Hungarian Dance No. 5".....
Opera Selection from "Il Trovatore".....Verdi
"Russian Trio".....Glinke
Intermezzo from "Cavalleria Rusticana".....Mascagni
"The Rosary" and "In a Pagoda".....John W. Bratton

Miss Thelma Thelma and Miss Marie Edgar should be real hits with the patrons of the big hotel. Miss Thelma comes with an Orpheum reputation and has a well-trained and melodious soprano voice. Her repertoire is said to be extensive and to include classical as well as popular numbers, including many selections from opera.

Miss Edgar will sing a number of popular chautauques. Her entertaining powers are declared to be unusually good and methods unique to local amusement-seekers.

The dance music of piano and drums will be furnished by "Sonny" Cunha and Manuel Marks, and the entire combination should prove unusually attractive to local people, as it virtually is a complete change from the music of the winter and spring season.

COOPERATIVE MARKET.

WAILUKU, April 21.—At a meeting held in Wailuku on last Monday steps were taken to organize a company for the manufacture and marketing of algaroba feed in the Kihel homestead district. It is proposed to incorporate a company under the cooperative law, the stockholders in which shall be principally the homesteaders themselves. Another meeting will be held in a short time at which the proposition may be finally put through.

Once Upon-a-Time Stories

by
Kate Marcia Forbes

MOUSIE GRAY.

One day grandpa was moving a big box which had stood beside the barn for a long time. He tipped the box over, and there in a little nest made out of corn husks and torn papers was a little, teeny weeny baby mouse. It was so frightened it couldn't run, so it sat quite still.

Grandpa reached down and picked it up, and carrying it all cuddly warm between his hands, brought it to the house to show grandma, mama and auntie. Mama and auntie were only little girls then, and they thought the little mouse was very cute. He was all covered with the softest gray fur, just as smooth and shiny as velvet. He had the tiniest little feet and the brightest little black eyes. Mama and auntie felt so sorry for him that grandpa let us keep them for a pet, because his home had been broken up and he was too little to get along without his mama.

We named him Mousie Gray. In just a few hours he got over being afraid of us. Dandy, the dog, did not even try to hurt him after we told him that he must not.

At first we made Mousie a little house out of a paper shoe box, cutting a little door for him to run in and out of, and putting a piece of cotton in the box for him to sleep on. Grandma showed us how to feed him. We would give him a few drops of warm milk in a teaspoon and he liked it as well as the food his own little mouse mama used to bring him.

(To be Continued.)

LATEST MODEL OF AUTO-CYCLE PRESENTS MANY IMPROVEMENTS

Excelsior No. 17 Has New Features That Interest Motorcycle Enthusiasts

The new Excelsior Auto-cycle, Model 17, which has just been announced, has many attractive features to interest the motorcycling enthusiasts.

The operation of the valve release is absolutely automatic in connection with the operation of the foot-starter. At the beginning of the downward thrust of the starting lever the exhaust valves are automatically opened and at exactly the proper instant are automatically closed, relieving the rider of all responsibility in this connection and insuring a start regardless of other conditions, it being only necessary that a supply of gas be formed at the carburetor ready to be drawn into the motor.

Operation of the three-speed gear is by means of a lever at the left side of the frame, which acts through a single connecting rod to the shifting mechanism in the gear case, thus there is no complication of levers, shafts, etc., to wear or loosen.

The gear shift lock is another improvement. This lock is now operated directly by action of the clutch lever, which, on releasing the clutch, bears directly on the locking lever. By this construction there is no possibility of lost motion and no wires

or other light parts to stretch or otherwise get out of order. Its action is direct, positive and infallible.

The internal brake is a raybestos-faced expanding ring so designed that its efficiency is fully equal to that of the outer hand brake. This is applied by the left foot pedal, which is so constructed that when it is pressed forward and downward it first releases the clutch then operates the gear release and finally applies the brake.

BRIGHT'S DISEASE

We proclaim this new FACT IN PHYSICS—Influence the renal tract with an agent that opposes renal granulation and degeneration and urinalysis will, in many cases, within 20 days begin to show diminishing albuminuria in Bright's disease.

The prescription counter having been without an agent to diminish albuminuria (see Tyson page 155) the importance of an Anti-Albuminuria is paramount and manifest.

That albumin can be reduced and that many of those succumbing to Bright's disease can have lives prolonged to other terminations has been established by urinalyses, and confirmed by disappearing symptoms in several thousand cases many involving dropsy and some, tapping.

The presence of albumen being a PHYSICAL FACT and its disappearance a FACT IN PHYSICS, there is no uncertainty as to the results that have been and are being obtained.

The Anti-Albuminuria (Fulton's Renal Compound) can be had at the Honolulu Drug Co. Ask for pamphlet Current bulletin of recoveries and rationale mailed on application. John J. Fulton Co., San Francisco, Cal.—Adv.
